Willow Subbasin Area Plan

State and Borough Land Designated For Use and Protection of Fish and Wildlife

 Primary land use

 Secondary land use

 Legislatively Designated Areas

 Areas with specific Land Use Designations

Management units shown in gray are primarily owned by the state and borough. In these areas detailed land use designations are prepared as well as management guidelines to control how these uses occur.

 Diagonal lines indicate where land use designations are made on borough lands.

 Areas with General Land Use Objectives

Management units shown in white are primarily privately owned but contain some parcels of state/borough lands. The area plan addresses appropriate land uses in these areas through general land use objectives prepared for each management unit; specific land use designations are made for state land in some cases.

LAND MANAGEMENT UNITS
